

DECEMBER 23 REPORT

Archaeologist's 'finds' on the Applegate site were described to us by Bartek Cichy from Kent Archaeology at our December meeting; it was amazing to see evidence of industry, settlement and trackways from thousands of years from the past.

Everyone present was given a copy of site maps, a list of spot-dating of the pottery and a list of coin finds in Borden plus a map showing the site of a Roman 'Dig' between The Street and Borden Lane.

Members and visitors were then invited to take a look at a display of many of the 'finds'.

Our 2024 programme is now available and subscriptions are due (£5)
